IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Anthony J. Stratakis, et al. Art Unit : Unknown
Serial No. : Unassigned Examiner : Unknown
Filed : January 11, 2000
Title : DISCRETE-TIME SAMPLING OF DATA FOR USE IN SWITCHING REGULATORS

Assistant Commissioner for Patents
Washington, D.C. 20231

PRELIMINARY AMENDMENT

In the Specification:

On page 1, line 1 of the application, please insert -- This is a continuation application of
U.S. Application Serial No. 08/991,394, filed December 16, 1997, --
Now U.S. Pat. No. 6,020,729

In the Claims:

Please cancel claims 1-22 and add the following new claims:

23. (New) A method of operating a voltage regulator having an input terminal to be coupled to an input voltage source and an output terminal to be coupled to a load, comprising:
alternately coupling and decoupling the input terminal to the output terminal with a power switch;
filtering a current between the input terminal and the output terminal to provide a substantially DC voltage at the output terminal;
capturing a measurement of an electrical characteristic of the voltage regulator at a discrete moment of time with a sampling circuit;
receiving the captured measurement with a feedback circuit coupled to the sampling circuit and the power switch; and
using the measurement to control the power switch to maintain the DC voltage substantially constant.
